THE REEFS WENT OFF

Committee members Cameron Gardiner with a nice red

A full blood moon, and an eclipse or light winds with some run, who knows what contributed to the feeding frenzy out at the reefs, but frenzy it was with CSC members reporting good fishing as these photos show. There was plenty of coral trout, and Dave Hickey and Terry Duncan got a good catch of Spanish. This month's fishing competition is themed the Big Catch. Rules and registration forms can be downloaded from our website or collected from the Tourist Information Centre, next to the museum in Victoria Street, Cardwell. Welcome to new committee members Dave and Trina Hickey. See you all at the club on Sunday.

MEMBERSHIP FEES

From 1st July 2018 our annual fees will be as follows:

- Single senior membership \$30
- Family membership \$45

Because we are transitioning from a financial year to a calendar year the amount due from 1st July 2018 to 31st December 2018 will be a pro rata amount as follows:

- Single senior membership \$15
- Family membership \$22.50

Please note that we are still subsidising our members fees to the Australian National

Sportfishing Association (ANSA) which provides our members with liability insurance while they are out on the water. The cutoff date for renewal is 31st August. Any payments made after the date will have to complete a new membership form. We are also going to be implementing changes to the conditions of membership. New members will be required to provide help throughout the year either at specified events or for working bees on a rostered basis. The club is run by volunteers and every hand on deck counts towards our club being ordinary or sensational. Thank you for your continued membership and support of the CSC.

ANSA Code of Ethics

- Obey and respect the local regulations and conventions that govern fishing in your chosen area.
- Purposefully conduct yourself in a manner such as to minimise any negative impacts on the environment. Being mindful of anchoring and speed restrictions is as important as preventing littering, pollution and habitat destruction.
- The fish's environment should be protected as well as the fish. Do not indulge in littering, in particular with discarded tackle. Disposal of offal and unwanted bait should be undertaken in a manner that is both environmentally sound and publicly acceptable.
- Respect the rights and interests of others especially other anglers and commercial fishers who are legally participating in the fishery.
- Respect the rights of property owners including those that exclude access for personal or cultural reasons and negotiate access to waters rather than trespass.
- Participate where possible in scientific, educational and community programs that benefit the fishery or recreational anglers.
- Fish taken should be killed quickly and should be prepared and preserved in such a manner as to minimise spoilage and waste. Where a fish is not wanted it should be returned in such a manner as maximises its chances of survival. Wanton destruction of undesired species is unacceptable. Limit your catch – not catch your limit.
